Reducing stigma requires a change in behaviours and attitudes toward acceptance, respect, and equitable treatment of people with mental health problems and mental illnesses.

UNAIDS 4 Background From the start of the AIDS epidemic, stigma and discrimination have fuelled the trans-mission of HIV and have greatly increased the negative impact associated with the epidemic.

People with mental health problems say that the social stigma attached to mental ill health and the discrimination they experience can make their difficulties worse and make it harder to recover.

The gynoecium may consist of one or more separate pistils. A pistil typically consists of an expanded basal portion called the ovary, an elongated section called a style and an apical structure that receives pollen called a stigma.

Persons with mental illness frequently encounter public stigma and may suffer from self-stigma. This review aims to clarify the concept of mental illness stigma and discuss consequences for individuals with mental illness.

This article contributes to research that seeks to understand experiences of teenage motherhood. Specifically, it focuses on the stigma attached to teenage pregnancy and parenting. Negative stereotypes continue to dominate understandings of teenage pregnancy. Despite research to the contrary, teenage mothering is popularly linked to welfare ...
